

[

Hello developers! Welcome to Nutz & Boltz O11Y.
Track how your page is performing and look for security tip offs.

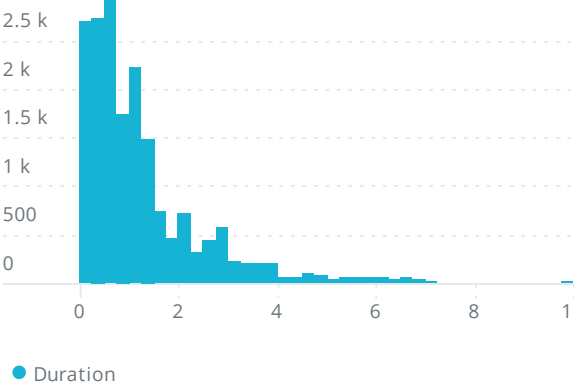

What does each widget do?

- Pageload Time: Pageloads by time taken
- User Operating System: Number of users for a particular OS
- Mobile Device Crashes: Lists session ID and city of mobile crashes
- Cloud Provider: Lists session ID and Cloud Provider & Instance (if there are any)

Visit our github repository:
